

Continuing professional development

Fundamentals of Practice Nursing

Build a foundation for providing safe, evidence-based & effective care for your patients

MOD004974

30 credits, level 6

All campus locations available

About the course

The education and development of the practice nurse workforce is a key priority in healthcare. Our module will provide you, a registered nurse, who has been in general practice for less than a year, with a foundation for providing safe, evidence-based and effective care for patients and the ability to work as part of the primary health care team.

A professional career framework is required for nurses entering General Practice and this module represents the cornerstone upon which foundations can be laid. NHS values-based care and the "6C's" will be core themes running throughout this module.

Content

- The principles of safe clinical assessment
- Minor illness, Managing long-term conditions
- Wound care, Ear care
- Cervical screening, Sexual health
- Immunisation and vaccination
- Mental health awareness, including dementia care

Who should attend

You will be a qualified nurse who has been working in general practice for less than a year.

BSc (Hons) Primary Care Nursing (Top-up)
